

DFROBOT 4WD MINIQ COMPLETE KIT

Introduction

4WD MiniQ mobile robot is especially designed for learning purpose. It comes fully assembled and all you need is a PC with Arduino IDE and 4xAA battery.

The 4WD MiniQ has built-in encoders, 5 infrared line tracking sensor, 2 infrared transmitter, 1 infrared receiver, two light sensors, 5 buttons and 1 buzzer.

It is powered by most popular Atmega 328P which is fully compatible with Arduino.

The kit comes with

Specification

- 4 DC Motor Driven
- Max Speed: 79cm/s
- Atmega 328P microcontroller
- Arduino Compatible
- Size: 112x102x42 mm
