

2A Motor Shield For Arduino

Brand: [DFRobot](#)

Product Code: DRI0009

Introduction

This Arduino Motor shield uses L298P chip which allow to drive two 7-12V DC motors with maximum 2A current. This shield can be directly mount onto standard Arduino Duemilanove and Arduino Mega.

Specification

- 2 way 7-12V motor drive
- Up to 2A current each way
- Pin 5,6,7,8 are used to drive two DC motor
- Support PWM speed control
- Support PLL advance speed control
